

Becky Olson's presentation summary

In this session, we discussed IEPs versus 504's including the qualifying disability areas as well as accommodations and modifications. We also discussed topics including transition from elementary to secondary as well as post-secondary transitions. Information regarding diplomas versus certificates was discussed and what that looks like in regards to post-secondary education options. Resources including Medicaid Waivers and Medicaid, Supplemental Security Income, and other resources were shared. The audience shared their experiences as well as asked questions regarding the ketogenic diet in the school setting, and testing ketones in the school setting, among many others. The audience was able to share specific experiences to help new parents in the school process.

Let me know if you need anything more specific.

Thank you again for the opportunity. I feel that the presentation was well received and there may be room for expansion on the diet in the school system. We have all had different experiences as far as the diet in the schools dependent on staff, leadership, expectations, and the school's liability.
